

MARINE SURVEYORS

ABOUT US

HEPELLE is a Singapore based international company having experienced in Marine & Cargo Surveys, Cargo Superintendence, Pre and Post Shipment Inspections, Port Captaincy and Consultancy. We are dedicated to provide a complete and comprehensive range of services in all forms of marine and Cargo surveying.

HEPELLE has experienced employees having several years of experience in Marine / Cargo survey and other marine activities. We have ensured the safe and efficient storage and transportation of commodities ranging from dry bulk to more challenging cargos such as hazardous chemicals and refrigerated cargo.

COMPANY OBJECTIVES

The proper determination of the cause and extent of any damage must be entrusted to Surveyors who have appropriate expertise and experience. Similarly, whether or not a particular loss is covered by any insurance and, if so, to what extent, is the province of skilled Surveyors and Claims Consultancy. These skills are paramount to marine survey and the insurance claims handling services.

HEPELLE has been established to provide comprehensive and professional marine survey services. The Company will utilize the expertise and experience of its personnel to provide quality surveying and claims consultancy services.

We believe that the combination of local knowledge and experience with that of highly qualified Surveyors will enable us to provide an unparalleled and cost effective service to our Clients. Our surveys are performed for a number of reasons and the procedures for each varies to best suit our Client needs.

HEAVY LIFTS & PROJECT SERVICES

The transport of large indivisible loads and other extraordinary items of cargo require specialised planning and co-ordination of transport resources overland and by sea.

HEPELLE provides planning, risk assessment, evaluation and logistics control management services to ensure that the risks involved are minimised and the project successfully completed.

Each and every project is unique of its kind, requiring wider knowledge and experience. The experience of our surveyors in marine casualties, we have the capability to fully assess the risks associated with special projects on behalf of our customers.

We work closely with our customers and their contractors alike in establishing the available resources and assessing the critical and high-risk aspects of each project. Our customers benefit from our assessment in appreciating the risks involved and managing the risks effectively.

HEPELLE act as Warranty Surveyors to protect the interests of all parties, ensuring that best practice & correct procedures are followed and that adequate preparations are made before the marine lift operation is undertaken. This includes independent verification of procedures and design calculations.
